Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/785,653	Applicant(s) BITTERLY ET AL.	
	Examiner Virginia Manoharan	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicants should provide a copy of the **Waste Management Program, Final Report NASA REPORT No. 25,158. - Final report of technical results on contract NAS 9-1680, 1965** listed in PTO 1449 form filed on June 18, 2004 in response to this Office action to complete the record on file .

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19 and 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. That is, what causes vaporization and condensation? They are not positively mentioned in the claims. No steps or means are provided such that a purified vapor is created within the first shell and a purified vapor is caused to condense as recited in claim 19. Note also claim 22 recitation e.g., of “the vapor condensing on the outer surface of the first shell as a purified liquid”. [In this regards, note applicants’ **“REMARKS”** (06/20/08) at page 7, second full paragraph, that “... transfer for vaporizing the incoming liquid comes from the heat of condensation on the outer side of the shell, and vaporization cools the shell so that the vapor condenses on the outer surface of the shell”. The remarks, when incorporated in the claims, would obviate the rejection .

Claims 19 and 21-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraphs, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Call et al discloses a boiler and condenser with annular volume that are used in a process.
